

Safe, Sound and Ready to Roll!

**Most RV's Don't Wear Out,
They Weather Out,
So Store It Inside!**

Inside Storage Will Help...

- ✓ **Reduce exposure to UV light** which damages rubber roofing, paint, plastics & fabric.
- ✓ **Reduce the daily expansion / contraction cycles** caused by the sun & temperature changes which stress seams causing them to leak.
- ✓ **Eliminate snow / water dams** on roof.
- ✓ **Prolong the life of your RV** & keep it newer looking.
- ✓ **Maintain higher resale value.**

Economical inside storage is available for travel trailers, boats, motorhomes (no class A's), 5th wheels, cars & trucks at Windsock, Inc.

The Winter storage rate is:

\$17.00 per foot of overall length for travel trailers and boats

\$19.00 per foot of overall length for motorhomes (no class A's), 5th wheels, cars and trucks.

Length is measured from the hitch to the rearmost projection at the rear, \$300 minimum. This rate is for units up to 8 feet wide. Height of door is 12 feet. Multiple drop-off and pick-up dates are available.

The storage building is cement block construction with a concrete floor and aluminum roof; it is kept ventilated. We are located in the quiet Lykens Valley about 45 minutes north of Harrisburg. The storage facility is behind our home and is under our watchful care. The storage area is kept locked as well as the gate to the drive. A forklift with hitch is used to maneuver RV's into and out of the building.

Please call us and leave your name, address and phone number and we will send more information and our rental agreement form to you.
